

CARDIV

Common Rail Injector Tester

V310 ex

V310 ex is an injector test equipment which tests all types of injectors including Piezo.

Features

- Test applicable to **BOSCH, DELPHI, DENSO, SIEMENS.** and **PIEZO**
- Tests uniformity for **CRDi injector.**
- Tests One common rail injector at a time.**
- Tests injectors for **heavy commercial vehicle**
- Tests auxiliary injection, main injection, back-leak.
- Monitors injection pattern.
- Automatic cooling system
- Testing for injection figures.
- Tests various common rail in high pressure.
- 4 automatic memory channels
- Drive pulse, pressure, rpm can be adjusted.
- Rail pressure is adjusted in real time according to feedback of sensor.
- A suitable equipment for every **Work shop.**
- Color: Gray

Specification

Power supply	AC1 220V/50~60Hz
Size (mm) / Weight	600(L)X600(D)X1430(H)/150KG
Working pressure	110 ~ 1,350Bar, Up to 1650
High pressure	by installed CRDI high pressure pump
